# STORK TECHNICAL SERVICES AND AJS CONSORTIUM PARTNERS SECURES EXTENSION OF SHELL ONEGAS CONTRACT

Stork Technical Services together with its partners in the AJS consortium has won a further 3-year extension of the existing Integrated Services Contract with Shell ONEgas, a combined business unit of Shell UK Exploration & Production (Shell Expro) and Nederlandse Aardolie Maatschappij (NAM). The contract has a value of € 200 million per year for the AJS consortium, which employs nearly 1,000 people across the UK Continental Shelf and Dutch sectors of the North Sea.

AJS is a consortium between Stork Technical Services (in particular Stork Industry Services B.V.), the international engineering and project management company AMEC and the Jacobs Engineering Group. AJS has been providing integrated services since 2003 under this contract, with an initial total value of €1 billion for the first 7 years.

“This latest contract extension confirms the recognition by Shell ONEgas of the exceptional performance delivered by the AJS consortium”, said Stork Technical Services CEO Doug Meikle. “Together with our consortium partners we are committed to delivering increased value as business partner to Shell ONEgas. Through its proven track record with the ONEgas activities in the Southern North Sea, AJS understands the business and operational challenges faced by the customer and possesses the competences required to address those challenges effectively.”

The Integrated Services Contract covers a total of 54 Shell ONEgas assets, including production platforms in the Southern North Sea fields and the gas treatment plants of Shell at Bacton, UK, and NAM at Den Helder, Netherlands, making it one of the largest and most comprehensive support contracts in the North Sea. Services provided under the contract include maintenance, modification, engineering, construction, project management and operational support. AJS operates from three main locations: Great Yarmouth in Norfolk, UK, and Amsterdam and Assen in the Netherlands.
